**The Coolest Way  
to Lower Your  
Electric Bill™**

- Maximize System Performance
- Increase Efficiency
- Lower Electric Bills
- Reduce Noise
- Prolong System Life
- Clean the Inside of the System

# Let the A/C Patriot Kit Protect and Improve Your Air Conditioning Investment!

*Did you know...*

- An air conditioner may start-up 6,000 times in a cooling season?
- An air conditioner may use up to 10 times more power during start-up than while running?
- During start-up an air conditioner may be exposed to more than 20 times more heat than your stove on high?
- Up 70% of your summer electric bill is due to air conditioning?
- An air conditioner can degrade 2-3% per year? Did you know this efficiency loss can translate to close to \$200 per year after 10 years?

## Defending Your A/C Investment

**Starts Your Air Conditioning System in  
Difficult Times and Protects it from  
Potentially Damaging Start-up Current**

- Boosts your compressor upon start-up through a powerful start capacitor
- Significantly reduces the time to start your air conditioning system
- Minimizes your air conditioner's exposure to potentially damaging in-rush current
- Pre-wired for quick and easy installation

### Lower Electric Bills

Enjoy fast payback. By reducing your system's energy consumption, A/C Patriot helps lower your electric bill and keep more money in your pocket.

### Cooler, Quieter Home

Cooler air flow and no more distracting noise while your system is working. A/C Patriot enables a smoother, quieter operation to keep your home cool and the unit running less.

### Reduce Maintenance Costs

Treat your system to less "wear and tear." A/C Patriot can save you from costly repairs and maintenance associated with neglected units.

### Long Lasting

One application is all it takes - exceeding engineering standards. A/C Patriot needs to be installed just once and works for the life of the unit.

### Product Innovation

Benefit from the ingenuity of a NASA scientist. A/C Patriot leverages the same innovative technology currently used in more than one million automotive air conditioning units.

### Proven Performance

You know it works. Produced by a leading manufacturer of refrigeration and air conditioning products. A/C Patriot consistently demonstrates top results in third-party testing.

### Professional Installation

Sit back and relax. A/C Patriot comes professionally installed by licensed, manufacturer-certified technicians, with a complimentary system check.

### Reduced Emissions

Help protect the environment by reducing your system's energy consumption. A/C Patriot lowers greenhouse gas emissions that pose a threat to the atmosphere.

**The Coolest Way  
to Lower Your  
Electric Bill™**

**An Innovative Lubrication Technology  
that Dramatically Improves the  
Performance and Efficiency of Your Unit**

- Reduces the oil layer in the evaporator and prevents oil build up
- Improves heat transfer and coolant flow
- Enhances overall lubrication to minimize wear and tear
- Could add years to the life of your air conditioner's compressor
